Re: Application of Western International Corporation for Mining Operation
at Silver Maple Mine, Summit County, Utah

Dear Mr. Spencer:

Reference is made to Order To Show Cause #ACT/043/003. This is to request a correction in the mining plan outlined in the above referenced Order To Show Cause. The order indicates that after mining operations "the applicant has agreed to enhance the operation by establishing a buffer comprised of a row of Russian Olive, Lombardi Popular, or other rapid growing trees, using ball rooted young adult plants (3-5 years old). The buffer is to be placed along the west boundary of the mine site for protection of the residents a short distance west of the site". It is the understanding of this office that the above precaution and measure is to be taken to reduce visual and noise impacts of the proposed mine project on adjacent property owners. It is hereby requested that the above stipulation be made a requirement prior to the commencement of any mining activity on the Silver Maple project.

It is further the understanding of this office that the operation procedures and requirements listed in the referenced Order To Show Cause constitute the stipulations of the Division of Oil, Gas, and Mining with respect to approval of the permit requested by Western International Corporation. Please advise if this understanding is correct and indicate the procedure that will be followed to guarantee compliance with the stipulations that may be imposed on the operation.

Thank you for the opportunity to comment in this matter.

Sincerely,
Stan Strebel
Stan Strebel, Director
Summit County Planning Office
